

Warehouse Master Node

RTSS Master Smart Node, the central unit in an environmental monitoring package. Providing the integrating unit for a full industrial environmental monitoring and Alarm Package.

Programmable Alarm and Process Control Matrix allowing for multiple response conditions.

- Local 7" Resistive Touch Screen Status Display
- Three RTSS Smart Sensor Loops
- Local Temperature and Humidity Sensors
- Network Link to Other RTSS Nodes
- Radio or GSM Alarm Link
- 3 Local Relay and Logic Outputs
- Local Data Logging
- Programmable Alarm and Process Control Matrix

Optional Smart Sensors	Specification	Features
Temperature / Humidity / Light Temperature / Pressure / Humidity / Light Submersible Temperature Alarm Button with Temperature Sensor Alarm Sounder Remote Relay Interface Remote 10.1" Resistive Touchscreen	Size: 240X240X120mm Supply: 24Vac Sensor Loops: Three Local Outputs: 3 Relay, 1 TTL Wire Termination: Terminal Cable Penetration: Stainless Gland 2X14mm 6X8mm	Construction: Sealed Stainless Display: 7" Resistive Touchscreen Communication Options: GSM, Radio, Ethernet Loop and Alarm Matrix User Configurable Remote Logging and Web Display
